Halloween!

TOPIC OF THE SURVEYS:

OCTOBER, 2012

Grade 4 Halloween Surveys

Dear Parent/Guardian,

I am writing home today to let you know of a very cool activity the grade 4's and 4/5 split will be completing this week at First Ave! We have been investigating data management and measurement over the past few weeks, and as part of the grade 4 and 5 curriculum, the students must collect data by conducting a survey and organize this data using charts and graphs!

So what exactly are we doing... ?

Well, if you look at the list of topics to the left, we are asking that your son/daughter comes to school on November 1st with their data (responses) to the survey questions. Throughout the day, the students will be coming around to conduct the survey and collect the information that your child provides to us! With that information, we will put it all together and present the results in the format of a really big graph for the entire school to see.

How much candy did you COLLECT?

We are REALLY EXCITED about this and hope that you can participate!! Please help your child to collect this information and have them write it down and bring it into school the following day.

Thank you so much, have a spooktacular Halloween!

Sincerely,

Mr. Lafrance, the grade 4's and grade 4/5's!

- How many Halloween treats did you collect in total? (chips, candy, chocolate, anything and everything that was collected!)
- What did you dress up as for Halloween? (superhero, something scary, princess, animal, etc.)
- Which hours did you go trick or treating? (for example: from 4pm to 7pm)
